

The Ghost Ship

What Really Happened?

The 'ghost ship' Mary Celeste presents us with an impossible mystery - the loss of everyone aboard a ship, and no clue to what really happened.

What is your theory about the disappearance of the crew? It may be a theory mentioned in the story, or it may be one you think of yourself. (It must match all the details given in the story, and not invent any new ones. It does not need to mention Abel Fosdyk's story at all.)

What really happened to the Mary Celeste?

Why are all the other theories wrong?
