

# The Luckiest Catch

## Sea Creatures

1. What interesting sea creature would you like to catch on the end of your fishing line?

---

2. Write a report about your sea creature.

- Find out as much information about your creature as you can from books or the Internet.
- Record facts about your sea creature under the following headings: Classification, Description, Habitat, Feeding Habits, Breeding Habits, Other Interesting Facts

3. Create a 3D model of your sea creature.

- Using items found around your house or school, design and create a model of your creature. Try to create colours and features as realistic as possible.
- The base of your model could be papier-mâché, empty boxes/containers, tubes, ropes or anything to make the basic shape. Cover the base in materials, paper or paint to create the texture of the creature's outer covering.
- Add final touches such as eyes, fins, scales.
