

Worksheet 1

Castaway

The Island

Alexander Selkirk lived on his island for four years before being rescued. The imaginary 'Robinson Crusoe' was on his island for twenty-five years.

Draw a map of the island, imagining all the features used by either Selkirk or Crusoe. Head the map 'Selkirk's Island' or 'Crusoe's Island'. Make sure you put in his house, his stockade (for protection), where he got his water, where he found his building materials, where he built his signal fire, as well as any other features you like. Label each one of them carefully.
